

## **No Cost Cybersecurity Services and Solutions**

The State of New Mexico's Office of Cybersecurity has partnered with Securin to provide the cybersecurity services below to New Mexico K-12s and higher education institutions free of charge.

- **Attack Surface Management (ASM)**  
Weekly scans and monthly reports to identify and manage vulnerabilities across your digital footprint.
  
- **External Vulnerability Scanning**  
Conducted six times this school year to evaluate and strengthen external-facing systems.
  
- **Network Penetration Testing**  
A thorough evaluation to establish a robust security baseline, transitioning into monthly vulnerability management for ongoing protection.
  
- **Internal Vulnerability Scanning (Monthly)**  
This service tracks remediation efforts and provides consistent insights into internal network vulnerabilities, prioritizing critical issues for resolution.
  
- **Web Application Testing**  
Comprehensive assessments for in-house and vendor-provided applications, tailored to each application's specific needs to bolster security.

Please contact Tracy Lopez [tracy.lopez@cyber.nm.gov](mailto:tracy.lopez@cyber.nm.gov) or Deb Miller [Deb.Miller@cyber.nm.gov](mailto:Deb.Miller@cyber.nm.gov) to onboard for services.
